PROFESSIONAL SUMMARY

Full Stack Developer with over 2+ years of experience in building, modernizing, and deploying scalable enterprise and cloud-native applications. Demonstrates strong proficiency in Angular and React for frontend development, as well as Node.js and Express.js for backend services. Possesses hands-on experience in designing RESTful and GraphQL APIs, implementing serverless and event-driven architectures, and deploying applications across AWS, Google Cloud Platform, and Kubernetes environments. Actively utilizes AI-assisted development tools to enhance delivery speed while ensuring the production of clean, maintainable code. Comfortable operating within Agile/Scrum frameworks, with a commitment to end-to-end ownership of features from design through to deployment.

WORK EXPERIENCE

September, 2023 – Present

Consultant | Full Stack Developer

Delta Technology and Management Services Pvt. Ltd

- Design, develop, and maintain enterprise-scale web applications using Angular, React, Node.js, and MySQL, ensuring scalability and maintainability.
- Architect and implement secure RESTful and GraphQL APIs, including serverless and event-driven architectures to support high-availability systems.
- Led the migration of RSI backend endpoints to a serverless architecture using AWS AppSync, GraphQL, and event APIs, reducing infrastructure overhead and improving scalability.
- Built backend services using the Serverless Framework (serverless.yml) to enable automated and repeatable cloud deployments.
- Implemented a custom Test Runner framework, significantly improving unit test coverage, execution reliability, and long-term maintainability.
- Identified and resolved security vulnerabilities during dependency upgrades and Node.js version migrations, ensuring secure coding standards.
- Migrated Angular applications from untyped to strictly typed forms, enforcing strong TypeScript interfaces.
- Developed an end-to-end HRMS platform using React, Node.js, MySQL, and TypeORM, including entity modeling and database migration management.
- Leveraged AI-assisted development tools such as GitHub Copilot and Cline (Claude APIs) to improve productivity and development speed.
- Deployed applications to production environments using Jenkins-based CI/CD pipelines across AWS, GCP, and Kubernetes clusters.
- Integrated GCP Cloud Storage (Buckets) for secure file upload and storage.
- Collaborated closely with cross-functional teams in Agile/Scrum environments, participating in sprint planning, reviews, and continuous improvement initiatives.

EDUCATION

Bachelor of Technology (B.Tech)

- Graduated at NBKR Institute of Science & Technology (2022) — CGPA: 8.00

TECHNICAL PROJECTS

E-Commerce Waste Management System (RSI)

- Angular, TypeScript, Node.js, Express.js, MySQL
- Designed and developed a comprehensive waste management and inventory automation platform.
- Implemented a custom Test Runner framework to improve test reliability and coverage.
- Addressed security vulnerabilities during package upgrades and Node.js migrations.
- Migrated Angular forms from untyped to strictly typed, creating well-defined TypeScript interfaces.
- Built modular Angular components and optimized backend APIs for logistics and material tracking workflows.
- Used AWS Services like - Lambda, AppSync, GraphQL, Event APIs, Serverless Framework
- Migrated traditional backend endpoints to a fully serverless architecture using AWS AppSync and GraphQL.
- Designed and implemented event-driven APIs for asynchronous processing.
- Managed deployments using serverless.yml, enabling scalable and cost-effective backend services.

HRMS with AI Integration

- Developing an AI-powered Human Resource Management System to automate HR workflows. Integrating Generative AI APIs for intelligent employee query handling and workflow automation using serverless architecture
- Tech Stack - React, Node.js, MySQL, TypeORM. Cloud- AWS, GCP, Kubernetes, Jenkins
- Developed an end-to-end HRMS application with React and Node.js.
- Implemented TypeORM entities and migration files to manage database schema changes.
- Used AI tools (GitHub Copilot, Cline with Claude APIs) to accelerate development.
- Deployed the application to live environments using Jenkins CI/CD, AWS, GCP, and Kubernetes.
- Integrated GCP Cloud Storage for secure document and file uploads.

TECHNICAL SKILLS

- **Frontend Development:** Angular (v14, v15, v17) and React for building scalable, component-driven user interfaces. Strong proficiency in HTML5, CSS3, JavaScript (ES6+), and TypeScript with emphasis on performance and reusability.
- **Backend Development:** Node.js (v18, v20, v22) and Express.js for designing secure, high-performance RESTful APIs, including validation, authentication, and error handling.
- **Database & Data Management:** MySQL and SQL Server with hands-on experience in schema design, query optimization, indexing, and complex stored procedures.
- **Cloud & DevOps:** Kubernetes, AWS (CDK, Amplify, Lambda, S3, API Gateway) for cloud-native and serverless deployments. Google Cloud Platform (GCP) experience with SDK usage, Cloud Functions, and Cloud Storage. CI/CD automation using GitHub Actions.
- **Generative AI & Automation:** Integration of Large Language Models and Generative AI tools such as Claude and Cline using API-based architectures to enhance automation and user workflows.
- **Testing & Quality Engineering:** Strong experience in unit and integration testing using Jest, Mocha, and Chai, along with contributing to a custom Test Runner to improve test coverage and reliability.
- **Tools & Collaboration:** Git, GitHub, Postman, VS Code with strong collaboration in Agile/Scrum teams.
